SUMMARY

Third-year CSE student who builds full-stack products with Next.js, Node.js and TypeScript, including a research collaboration platform on Cloudflare and an end-to-end encrypted messenger. Web development intern at Prodigy InfoTech with a letter of recommendation. Seeking a full-stack or backend internship.

EDUCATION

B.E. Computer Science and Engineering | National Engineering College, Kovilpatti 2024 – 2028 (Expected)
CGPA: 6.8 / 10

SKILLS

Front End: TypeScript, Next.js, React, Tailwind CSS, Three.js
Back End & Data: Node.js, FastAPI, Socket.IO, SQL, MongoDB, DynamoDB, Cloudflare D1/R2, AWS S3
Tools: Git, Docker, Linux, Tauri, Web Crypto API, Role-Based Access Control

EXPERIENCE

Web Development Intern | Prodigy InfoTech Aug 2025

- Developed frontend and backend features for client web projects; received a letter of recommendation for problem-solving and reliability.

Spatial Data Engineering Intern | Thazhal Geospatial June 2026

- Built a full-stack spatial AI tool (Next.js, Python, GeoPandas) that estimates Total Addressable Market for financial-infrastructure expansion.
- Wrote offline pipelines to ingest, clean and spatially aggregate 23,000+ commercial locations from the Google Places API into municipal boundaries.

PROJECTS

GeoForesight: Remote Sensing & GIS Research Platform | Next.js, TypeScript, Tailwind CSS, Cloudflare D1/R2

- Built a web platform where remote-sensing research teams publish, annotate and peer-review geospatial findings in one place.
- Implemented role-based moderation, threaded comments and Cloudflare D1/R2 storage.

Prism: End-to-End Encrypted Messaging | Next.js, Socket.IO, MongoDB, Web Crypto API

- Designed a messenger in which the server cannot decrypt messages, using client-side RSA/AES encryption with the Web Crypto API.
- Combined the encryption with Socket.IO real-time delivery while the server stores only encrypted payloads.

Orion AI: Local-First Personal AI Assistant | Python, FastAPI, Rust, Tauri 2, React, Three.js github.com/AstraDev-Labs/Orion-AI

- Built a FastAPI back end and a Tauri 2 + React + Three.js desktop interface for a fully offline personal AI assistant, with local speech recognition and synthesis.
- Packaged the app with a one-click Windows installer that sets up Ollama, dependencies and models without manual configuration.

HireHub: Campus Placement Management System (in progress) | Next.js, Node.js, DynamoDB, AWS S3

- Building a placement portal for students, recruiters and administrators with granular role-based access control and end-to-end encrypted messaging.

Smart Urban Mobility & Traffic Intelligence Dashboard | Bengaluru

- Built a business-intelligence dashboard with transit, traffic, weather and demographics modules for urban mobility analysis.

CERTIFICATIONS

- AWS AI & ML Scholar and AWS AI Practitioner Challenge (Udacity, 2026)
- Discovering Cybersecurity (Udacity & Accenture, 2026)
